

WWF Guianas is inviting for Bids to develop a Participatory 3-D Model (P3DM) of the Exclusive Economic Zone (EEZ) of Suriname as part of an EU-funded project titled: "Promoting Integrated and Participatory Ocean Governance in Guyana and Suriname: the Eastern Gate to the Caribbean" which commenced in early 2017. A major component of this project is Marine Participatory 3-Dimensional Modelling (P3DM), a community-based process, which integrates topographic data and geographical information with the spatial knowledge of local communities to produce a physical 3-D model. The assignment will preferably be carried out by a consultancy team to meet the diverse challenges for this analysis. This assignment is part of an EU funded project therefore applicants need demonstrate that they are legally established in an eligible country as per the rules on participation in procurement procedures and grants of the European Development Fund:
